Snow Will Continue This Evening

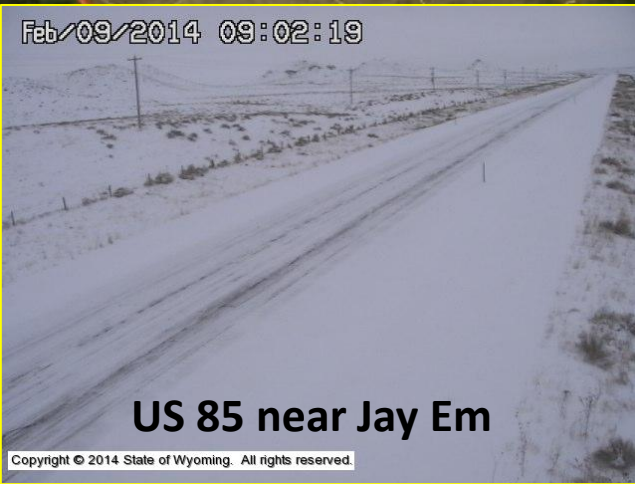

- Light to moderate snow will continue to move up from the south tonight.
- Snow will begin to end from north to south as the system moves southeast of the area tonight.
- Expect an addition 1 to 4" of snow...with the higher amounts along northeast facing slopes of the mountains.
- North to northeast winds gusting as high as 35 mph will continue overnight.
- Visibilities will be severely reduced due to blowing of snow.
- The heavy wet snow will be dangerous for vegetation.
- Travel will remain very hazardous!!

High Temperature Forecast

Valid ending Tuesday December 16th, 2014 at 5 PM MST

Created Tuesday December 16th, 2014 at 4:21 AM MST

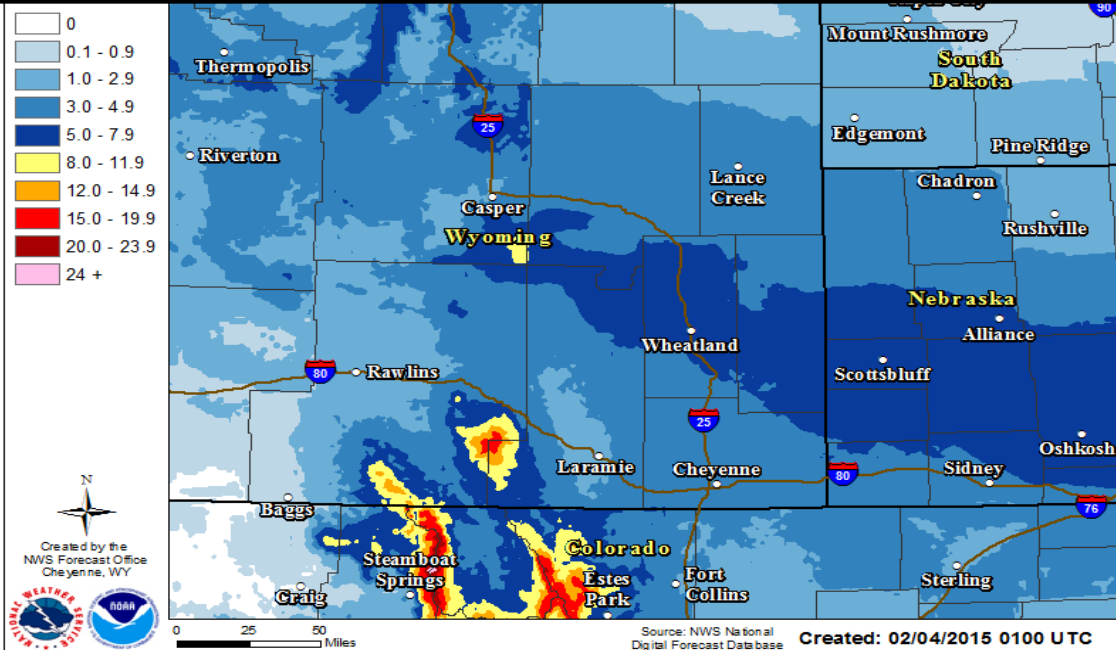

...Upcoming Winter Storm/Warnings Expanded...

IMPACTS

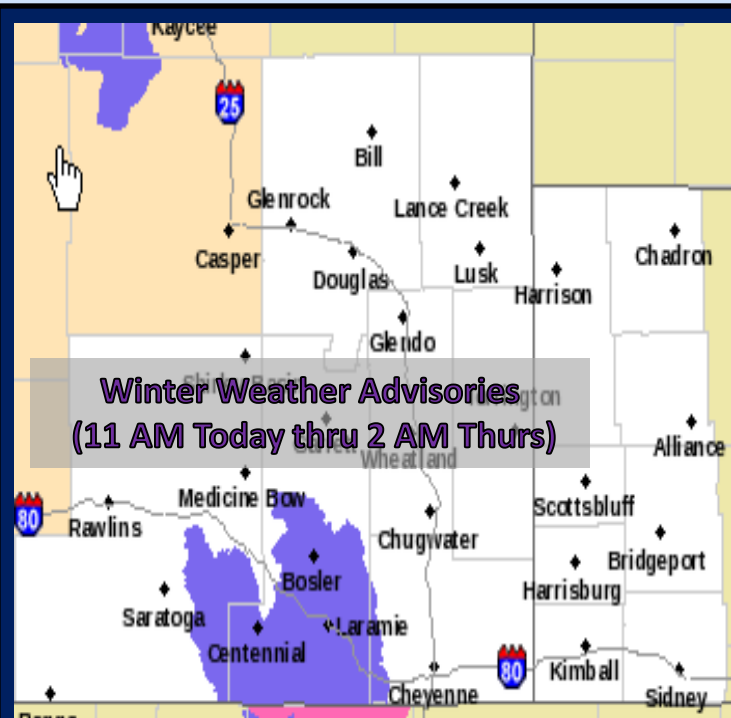

- Mostly to travel. Roads likely becoming slick and snow covered. Areas of blowing snow at times with reduced visibilities. Hazardous Driving Conditions Expected

Total Snow Amounts Through Wednesday Afternoon

- **Timing:** Tonight through Wednesday Morning
- **Snow Amounts**
Sierra Madre and Snowy Ranges: 15-20 inches
Lower Elevations: 3-6 inches with locally higher amounts
- **Risk For Area from Wheatland to Bridgeport for 12-14"**

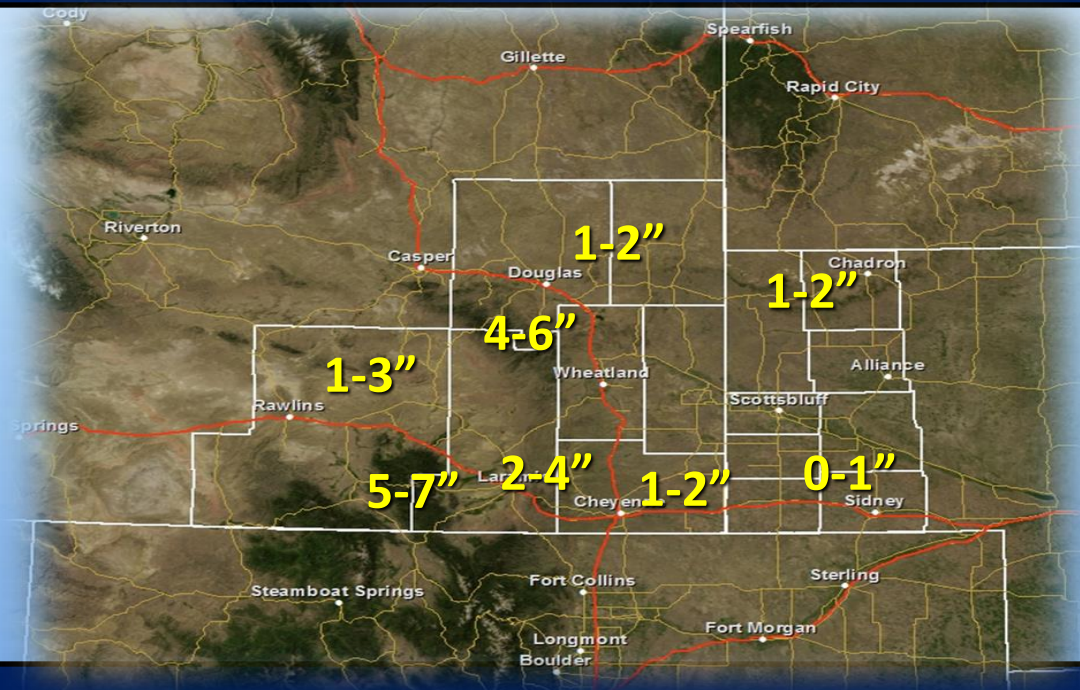

...Snow Through Early Tonight...

IMPACTS

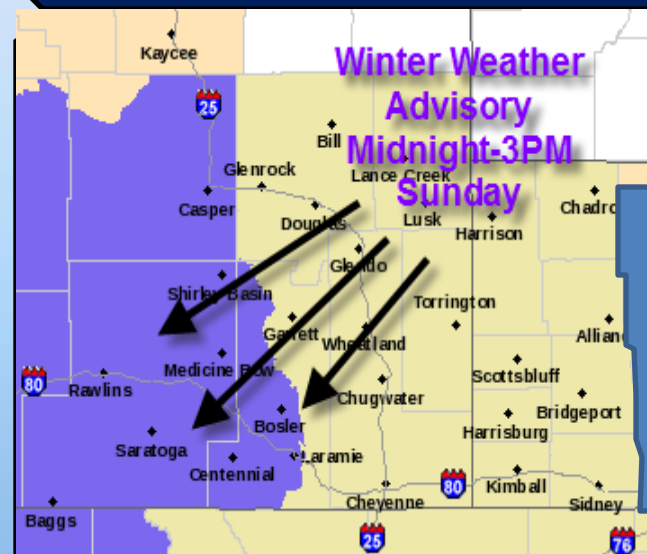

- **Mostly to travel. Heavier Snow Showers and Gusty Winds will result in Blowing Snow and Reduced Visibilities.**

Total Snow Amounts Through Tonight

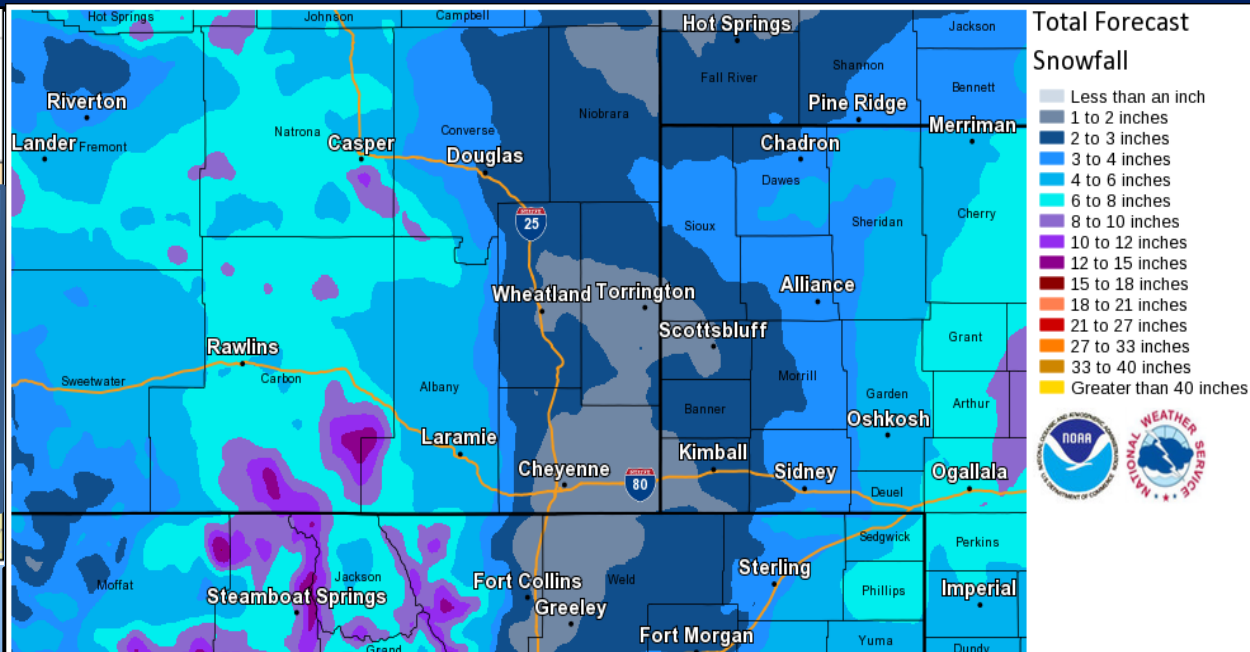

- **Timing:** Late This Morning through Late Tonight
- **Winds:** Gusts to 30-35 mph will create areas of blowing snow, especially over the Interstate 80 Summit.
- **Amounts:** Generally 2-3 inches over lower elevations along and west of Laramie Range. Lesser amounts over the plains.

...Snow Tonight through Sunday...

IMPACTS

- Slippery and snow covered roads, including Interstate 80 west of Cheyenne to near Rock Springs.
- Interstate 25 will also be impacted, mainly from around Douglas northward into southern Montana.

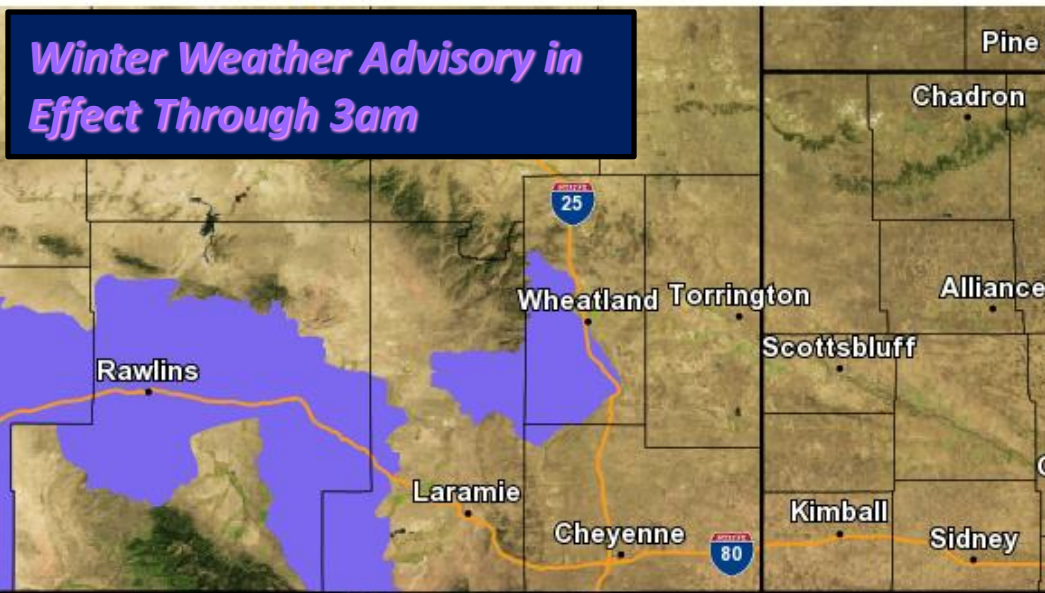

Valid ending at Tuesday December 16th, 2014 at 5 PM MST

Created Saturday December 13th, 2014 at 8:46 PM MST

- Snow developing over central Wyoming tonight, Nebraska late Monday.
- While light to moderate snow is expected over central Wyoming tonight through Sunday, Heavy snow is likely across central Nebraska Late Sunday into Sunday night. A period of heavy snow is also possible into portions of the Nebraska Panhandle.

Snowy and Cold Tonight

Winter Weather Advisory in Effect Through 3am

Temperatures will be downright cold tonight.

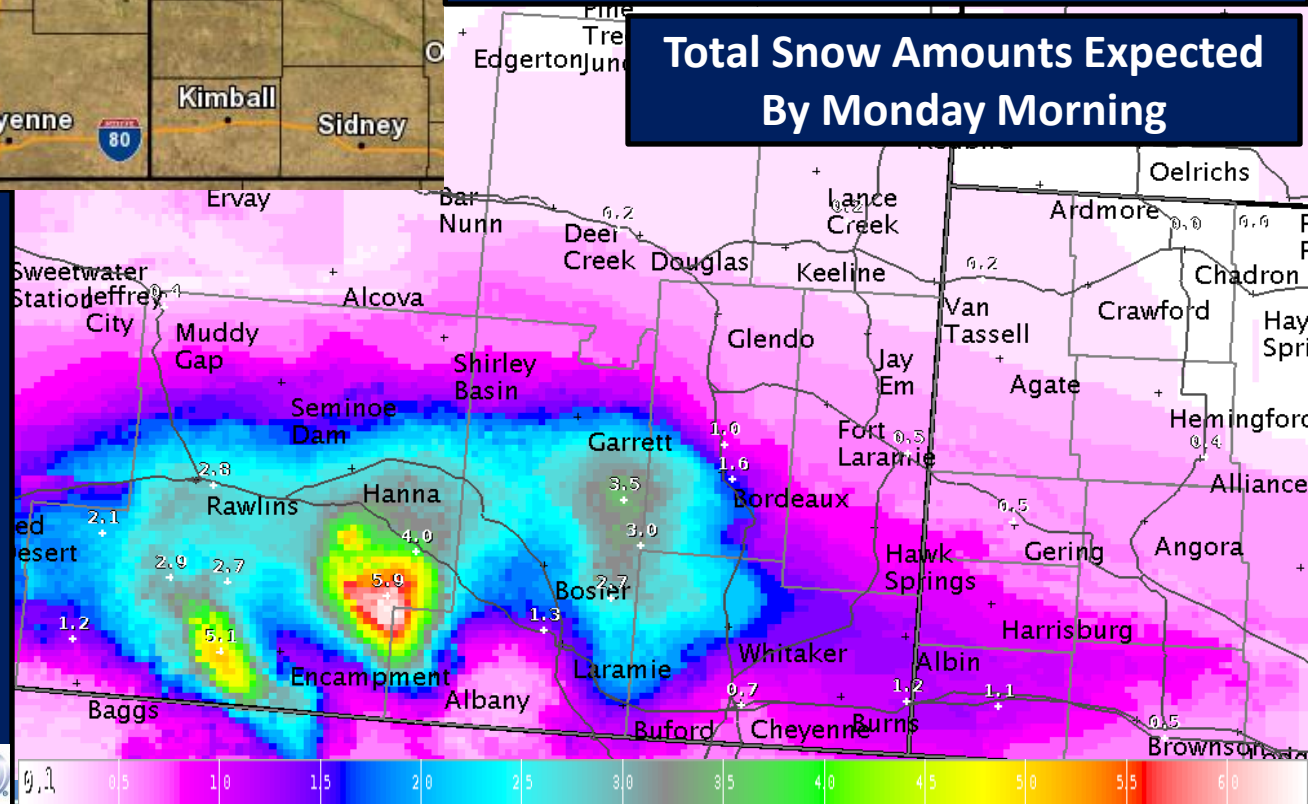

Expect readings in the single digits and teens across the area.

Some locations in southwest Carbon County will remain in the teens and 20s

Total Snow Amounts Expected By Monday Morning

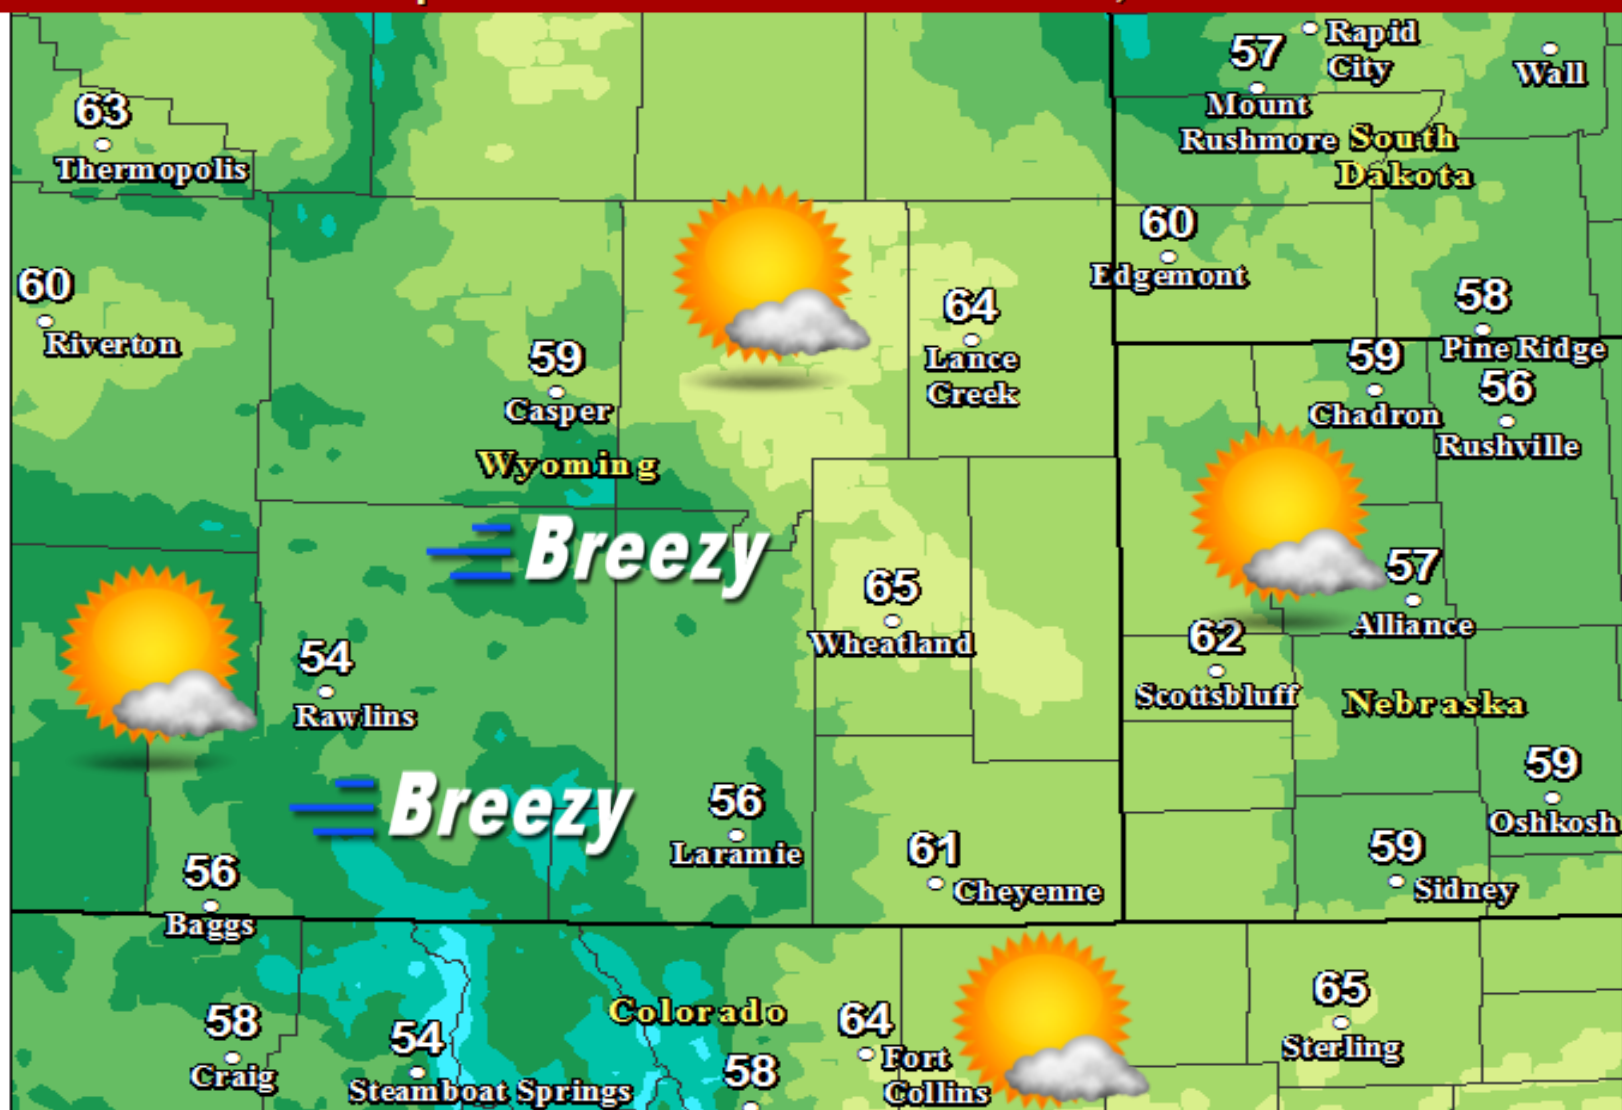

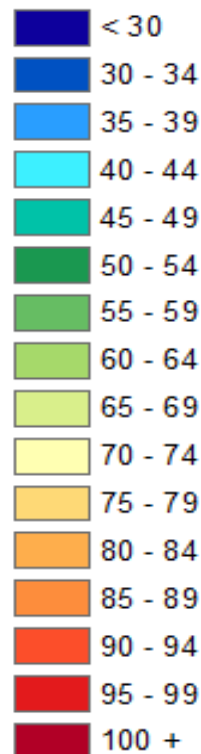

IMPACTS

- Hazardous travel with slick and snow covered roads.
- Reduced visibilities down to ½ mile at times.
- Cold temperatures will be hazardous for unprotected skin.
- Ranchers should take extra precautions to protect livestock.
- For travel conditions, dial 511

2/25/2015

Water Vapor Imagery 730 pm MST Dec 7, 2014

A fairly persistent upper level ridge of high pressure (yellow lines accompanied by the big blue “H”) will keep hold of the western US this week.

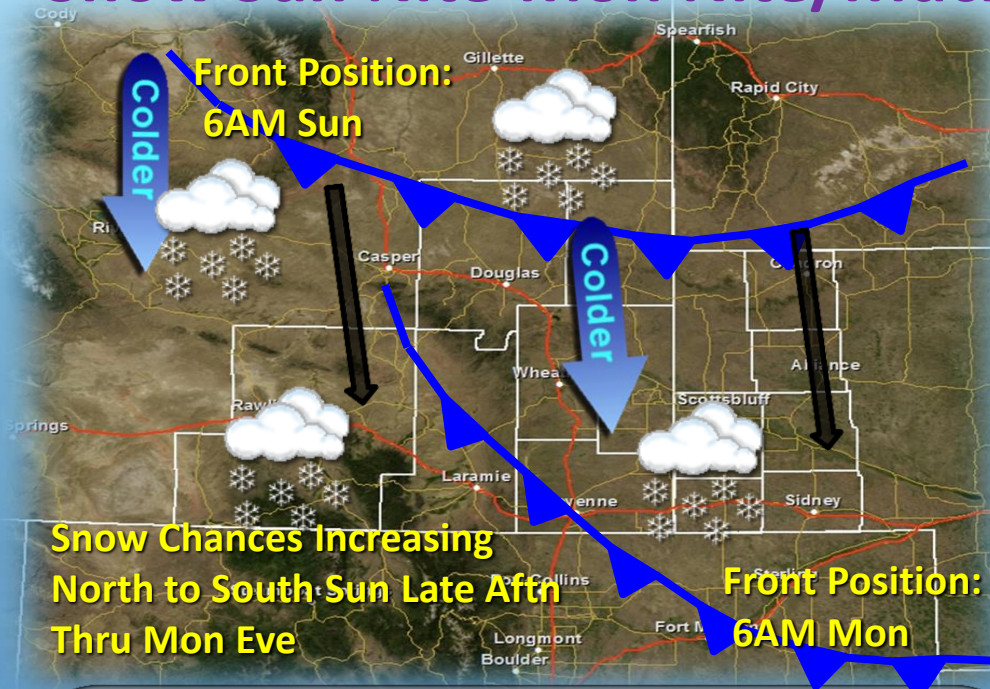

A few weather disturbances will move northeast (denoted by the cyan arrows) over the top of the ridge axis. However, little more than breezy winds & some mid & high clouds will impact southeast Wyoming & western Nebraska panhandle as these weather disturbances will not carry much moisture to produce precipitation.

What Can Water Vapor Imagery Tell Us?

Water Vapor Imagery from GOES highlights areas in the atmosphere where *moist air* is located (areas of white/grey, blue, green & other bright colors), as well as areas of *dry air* (broader areas of black, brown, & deep orange). Water Vapor Imagery is very useful for identifying atmospheric circulations.

Snow Sun Nite-Mon Nite/Much Colder Thru Wednesday

- Lows 5-10 Tue Nite and 0 to 5 Below Wed Nite

Cold & Snowy Conditions Return Friday
Afternoon into the Weekend

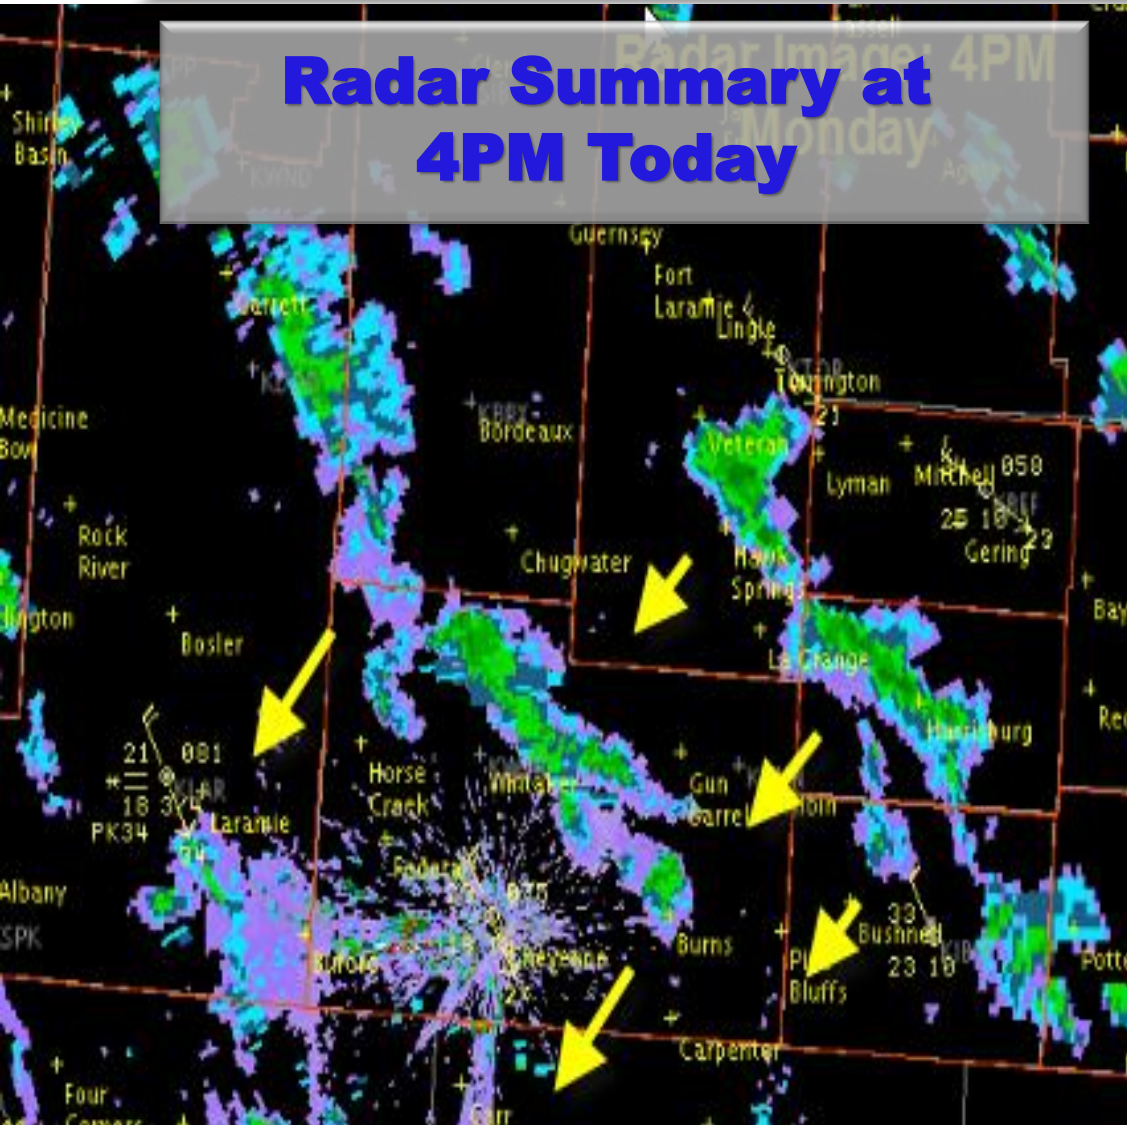

***** Significant Accumulations Possible, especially south of the North Platte River Valley *****

Light to Moderate Snow Thru Late Afternoon

Radar Summary at 4PM Today

A band of light to moderate snow will move south across portions of southeast Wyoming and extreme western Nebraska Panhandle through 6PM.

- **Light accumulations of 0.5-1", mainly on grassy surfaces**
- **Gusty north winds of 30 to 40 mph**
- **Winds and snow will reduce visibilities to under a half mile**
- ***Use caution if traveling along I-80, I-25, and Hwy 85!!***

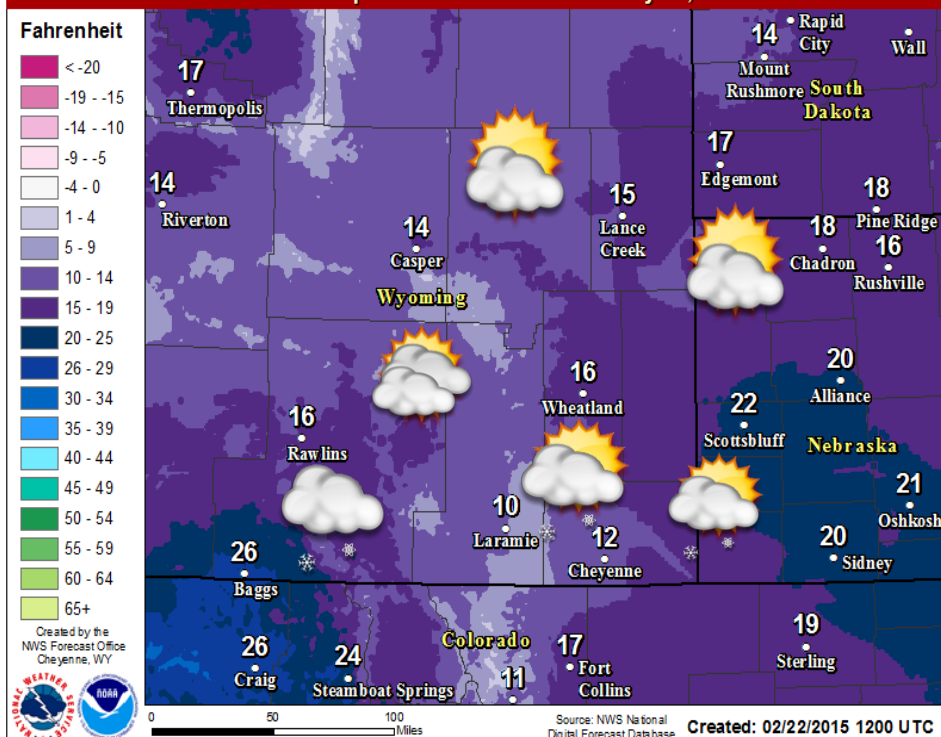

Today

Much Colder. Partly to mostly cloudy with occasional light snow in areas near the Colorado border.

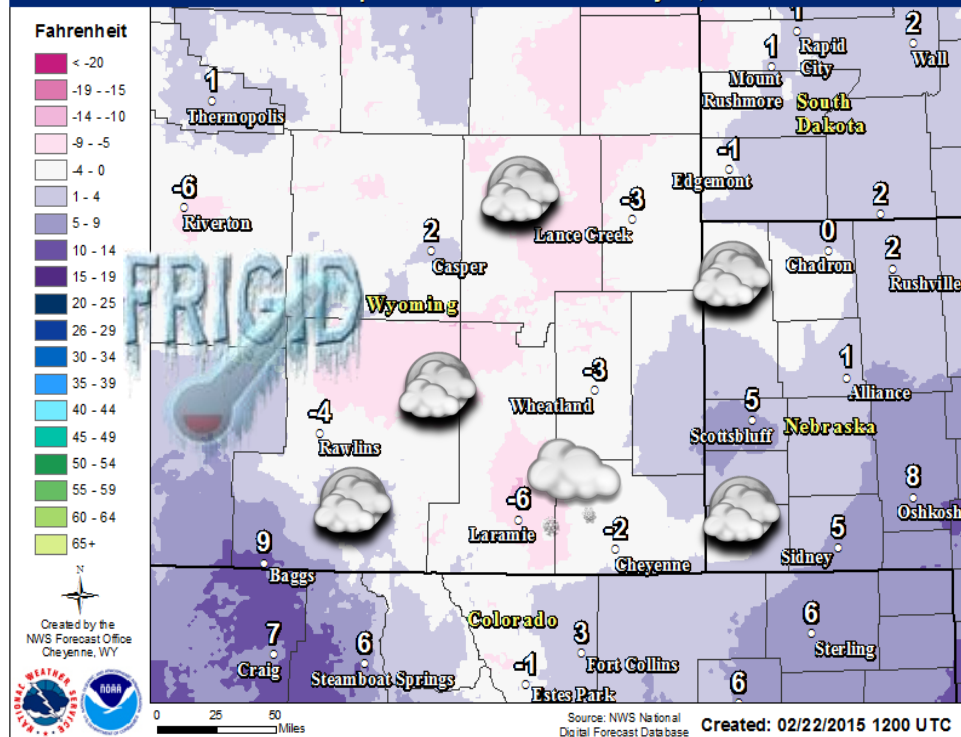

Tonight

Frigid temperatures in the single digits to below zero readings, with Wind Chills dropping well below zero. Bundle up if you have to venture outdoors!

Maximum Temperature Forecast - February 22, 2015

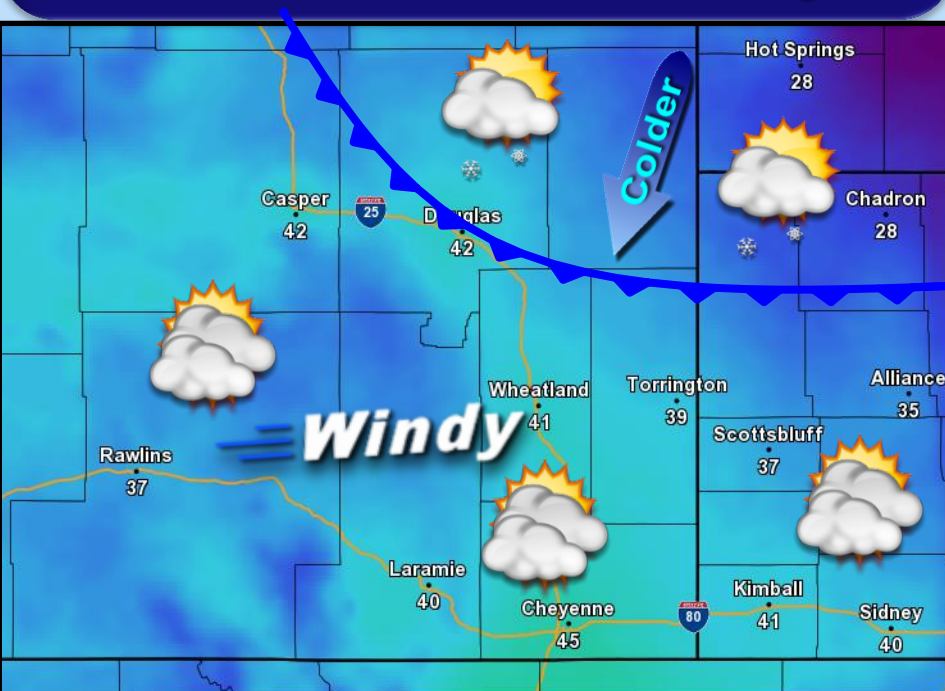

Minimum Temperature Forecast - February 23, 2015

Next storm system to bring light-moderate snow on Wednesday

Today

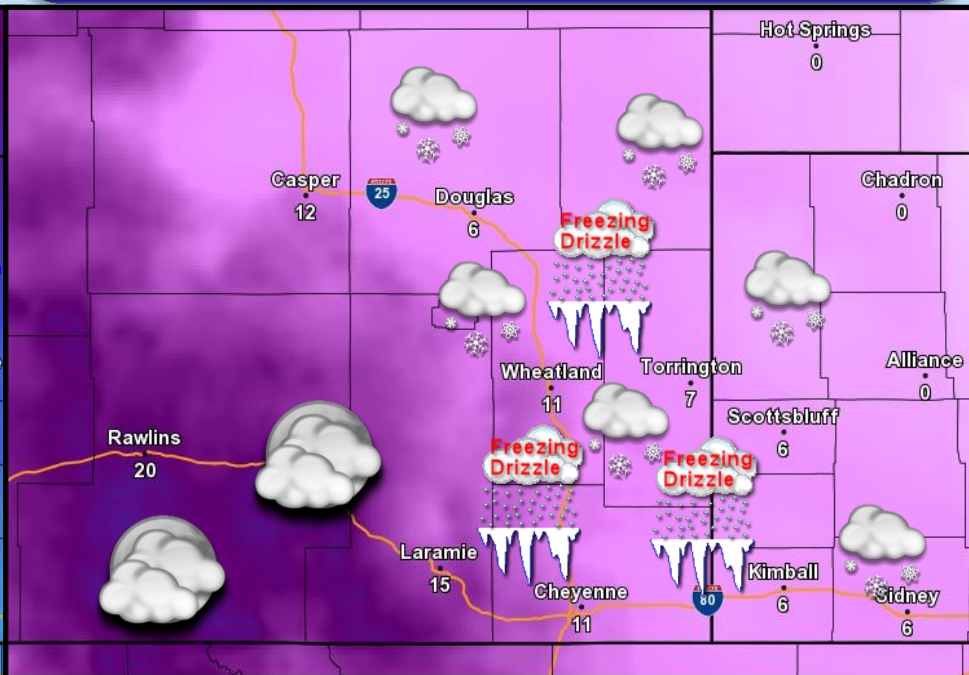

A bit cooler. Gusty west winds will continue thru this afternoon in the wind corridor. Another cold front will drop south late this afternoon & evening.

Valid ending Tuesday January 6th, 2015 at 5 PM MST
Created Tuesday January 6th, 2015 at 6:10 AM MST

Tonight

Much colder tonight behind the cold front with a chance for snow & freezing drizzle. Breezy north to northeast winds.

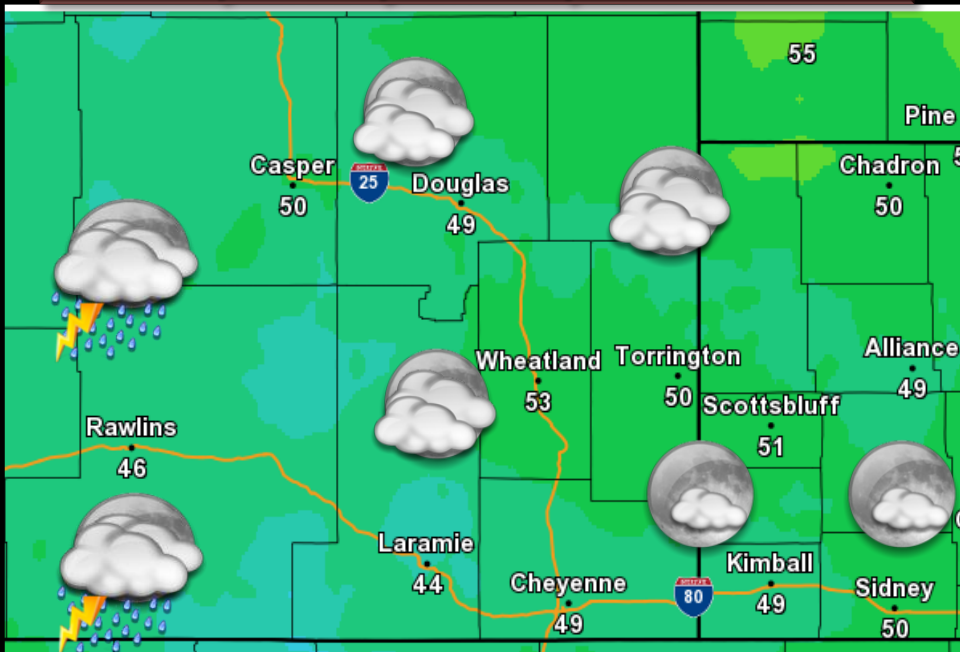

Valid Wednesday January 7th, 2015 at 5 AM MST
Created Tuesday January 6th, 2015 at 6:13 AM MST

Expect similar conditions through the remainder of the week.

Tonight

*Mostly Cloudy with Scattered Showers
& Isolated Thunder in the West.
Partly Cloudy and Dry in the East.*

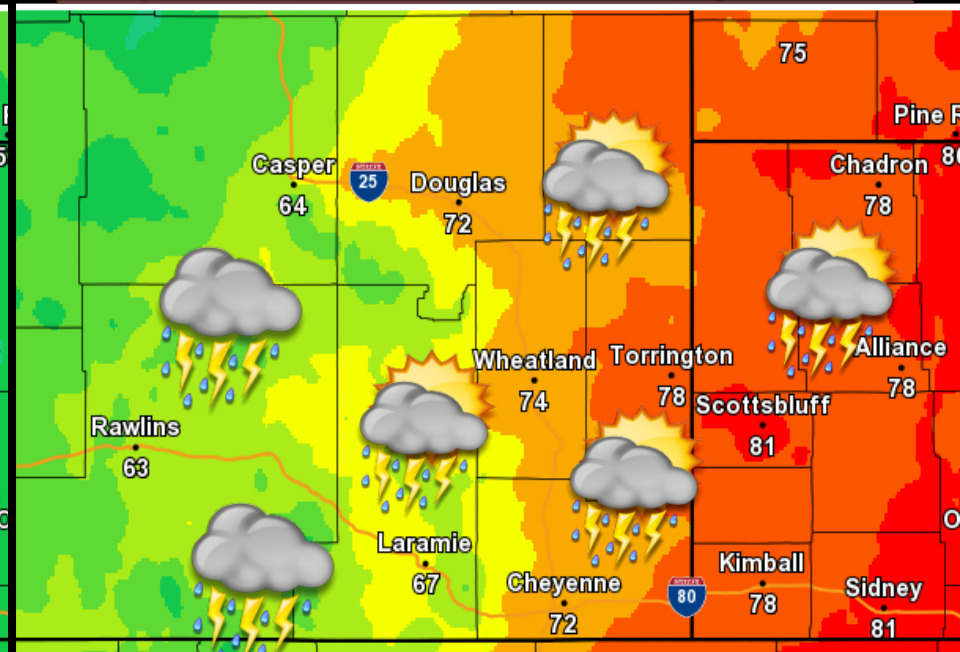

Valid Sunday September 28th, 2014 at 6 AM MDT

Created Saturday September 27th, 2014 at 9:17 PM MDT

Sunday

*Increasing clouds. Cooler. T-storms
spreading west to east thru the
afternoon; some with heavy rain.*

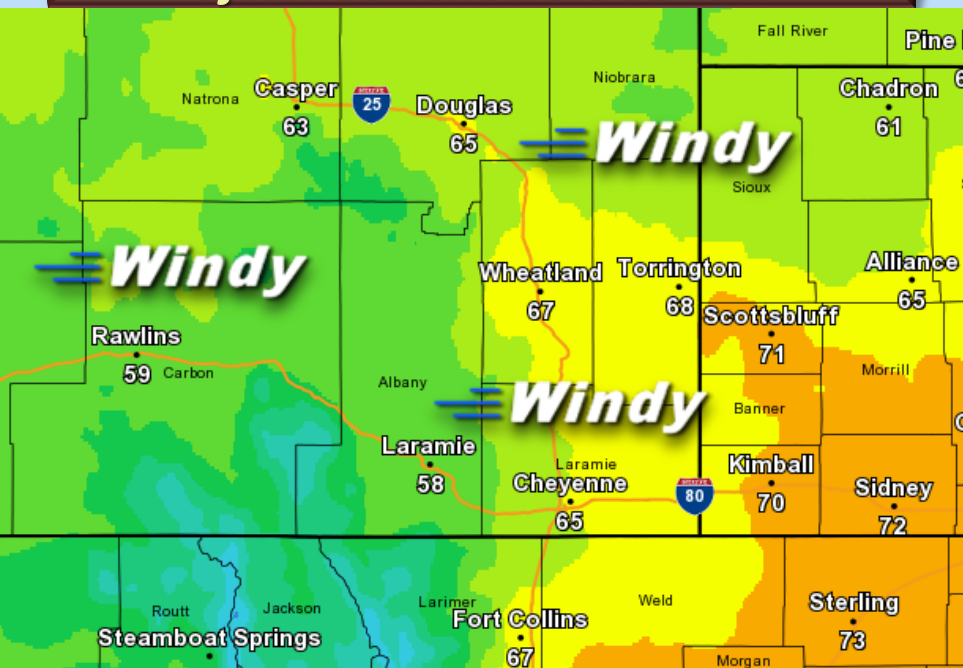

Valid ending Sunday September 28th, 2014 at 6 PM MDT

Created Saturday September 27th, 2014 at 9:15 PM MDT

**Much cooler temps along with continued chances for
afternoon/evening showers and t-storms thru Monday.
Mountain snows Mon night-Wed.**

Today

Windy and seasonably cool. Morning rain showers for east-central WY & Nebraska Panhandle. Slight chance of afternoon showers SE WY.

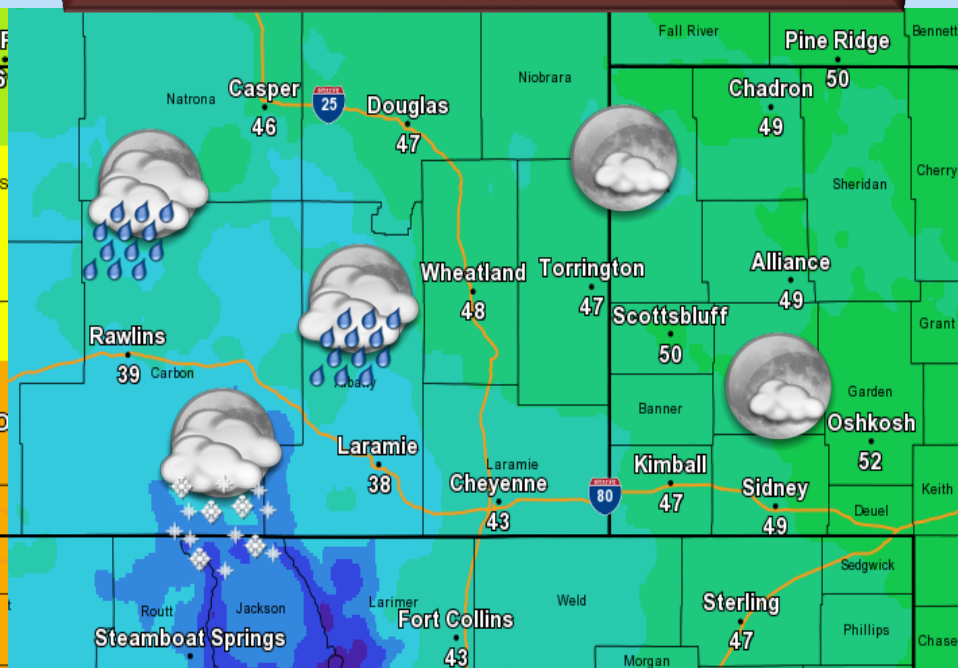

Valid ending Tuesday September 30th, 2014 at 6 PM MDT

Created Tuesday September 30th, 2014 at 5:20 AM MDT

Tonight

Partly to mostly cloudy with A few showers in the west. Cooler with low temperatures in the 30s west to 40 east.

Valid Tuesday September 30th, 2014 at 6 AM MDT

Created Tuesday September 30th, 2014 at 5:22 AM MDT

**Dry conditions Thursday and Friday
Continued dry & warmer for the weekend.**

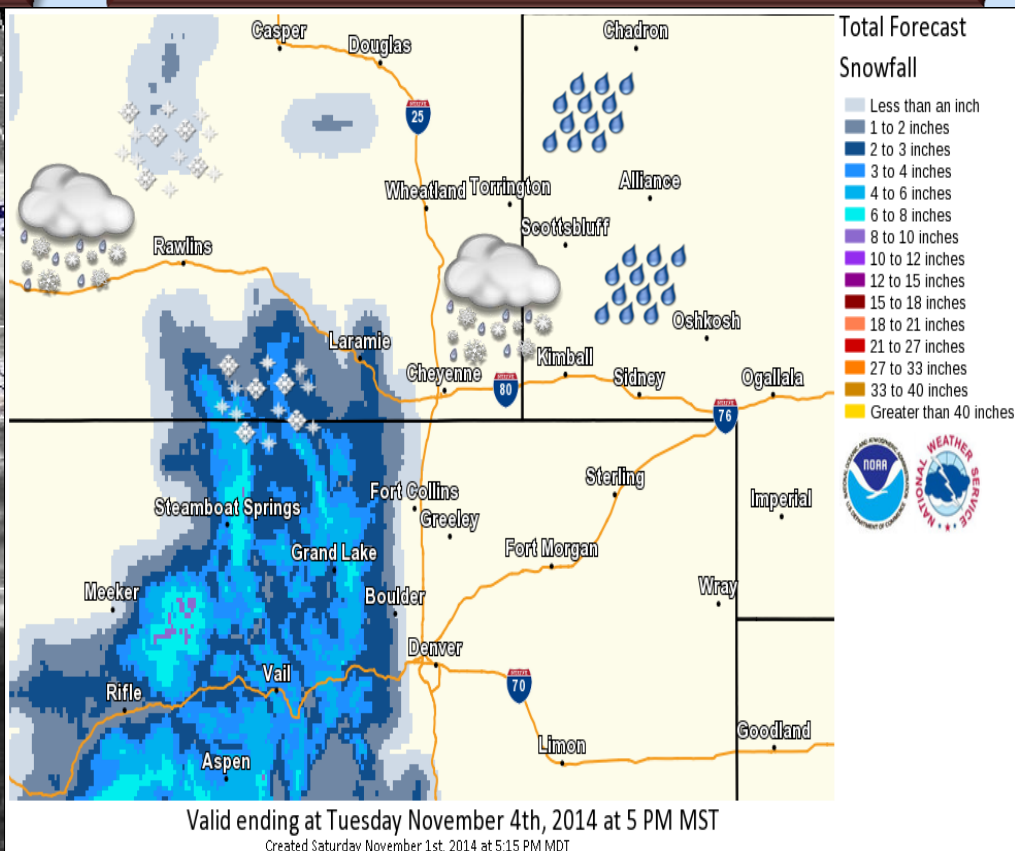

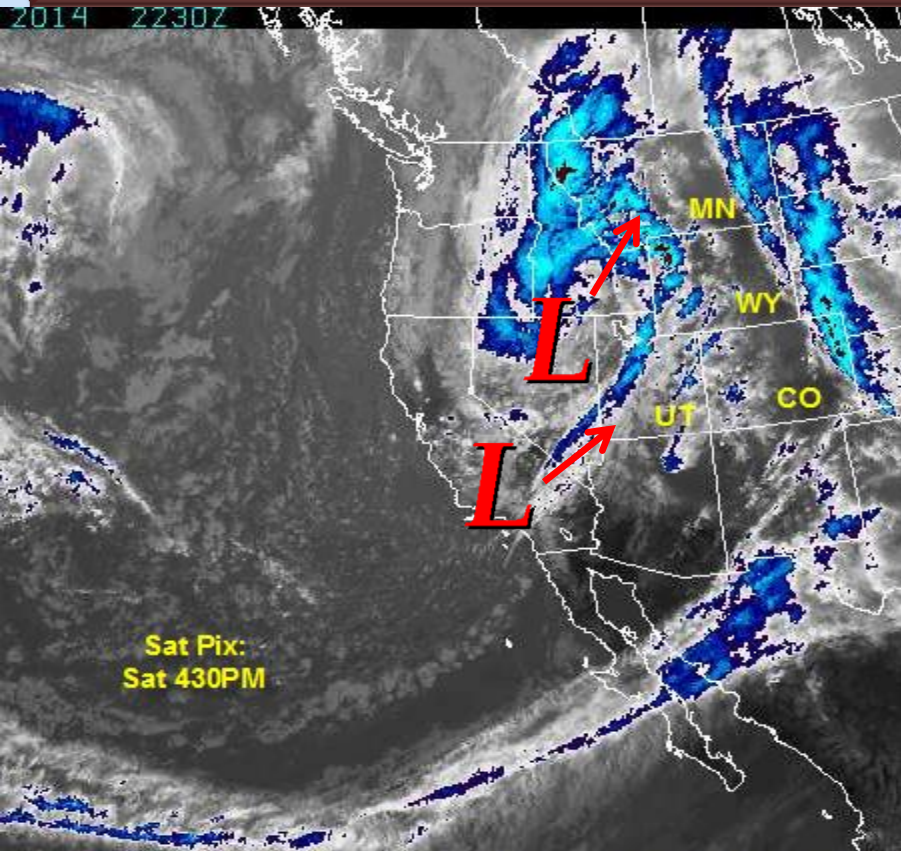

Sunday Night/Monday

*Turning Cloudy/Colder/Increasing Rain
& Snow Chances.*

Snow Accumulations

*Moderate Snow Accum for Snowy/
Sierra Madre/South Laramie Ranges.*

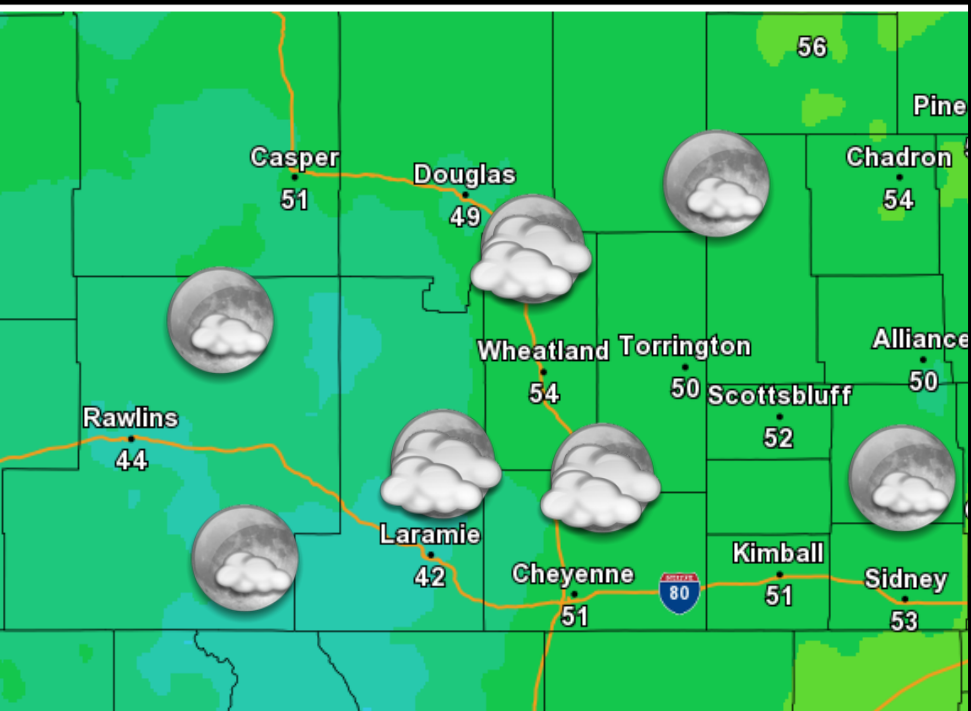

2014 2230Z

**Impacts: Hazardous Travel Between Cheyenne and Rawlins on I-80
Sunday Night into Monday.**

Tonight

Partly to Mostly Cloudy Near the Laramie Range. Otherwise Mostly Clear and Dry

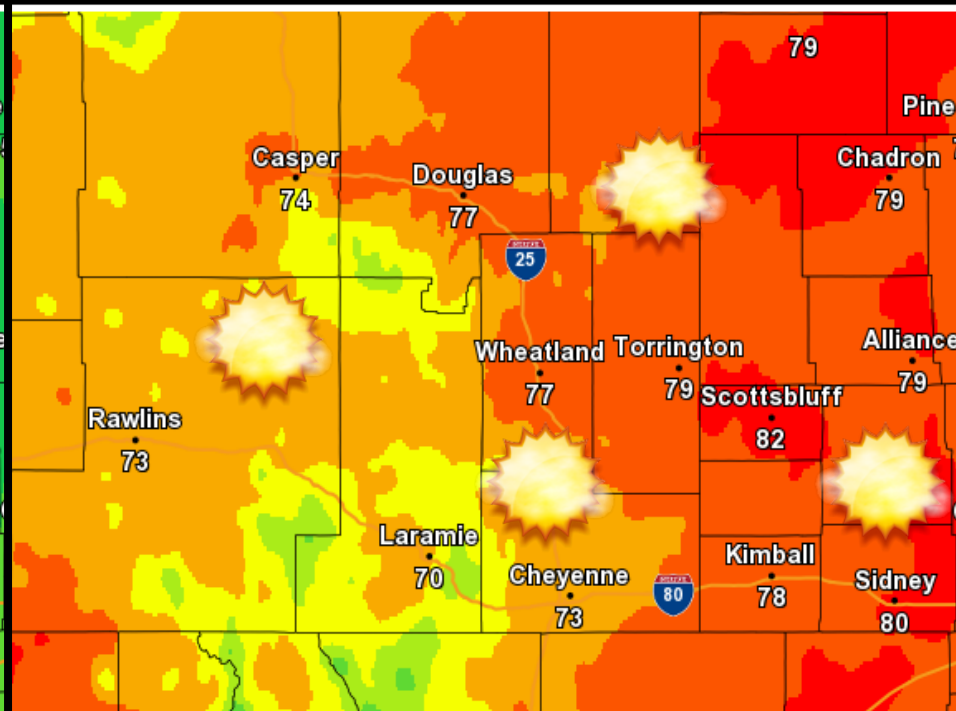

Valid Saturday September 20th, 2014 at 6 AM MDT

Created Friday September 19th, 2014 at 9:38 PM MDT

Saturday

Much Cooler and Continued Dry

Valid ending Saturday September 20th, 2014 at 6 PM MDT

Created Friday September 19th, 2014 at 9:35 PM MDT

Next chance for precipitation will be late Sunday through Monday.

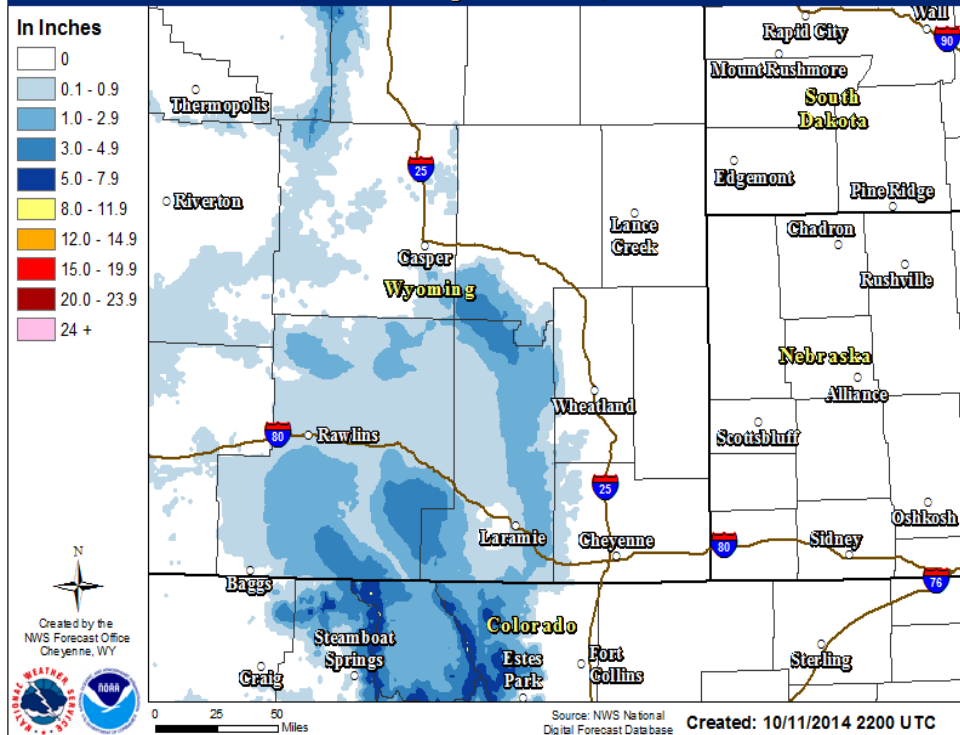

Cooler Sunday

A quick moving disturbance and associated cold front will bring cooler air Sunday

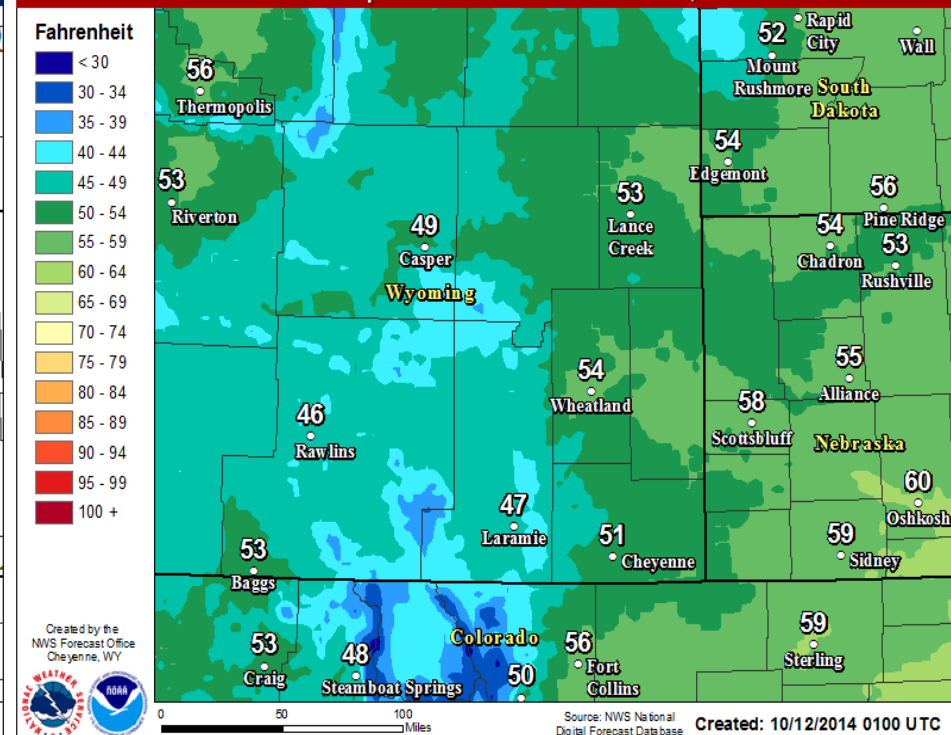

Sunday Snow

Along with cooler temperatures will come snow accumulations to the mountains.

Total Snow Forecast - Through October 13, 2014 02:00 AM EDT

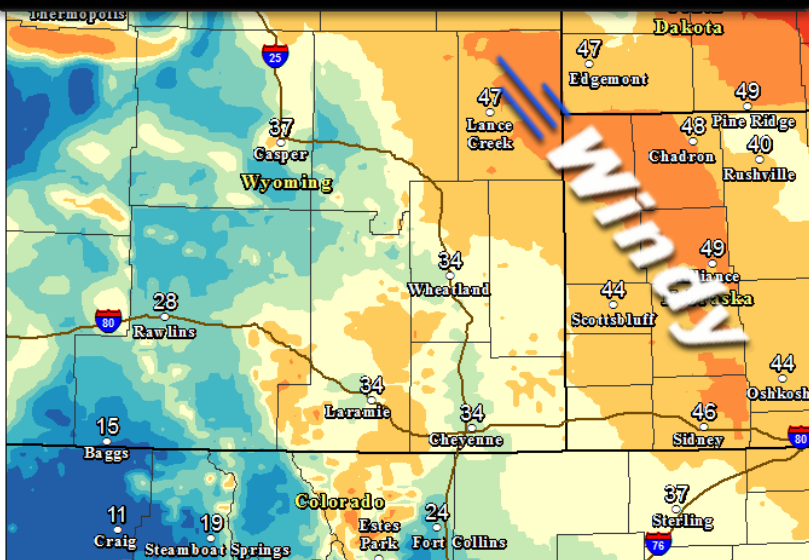

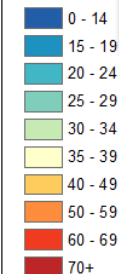

Maximum Temperature Forecast - October 12, 2014

Little to no snow accumulation expected outside of the mountains of southeast Wyoming with most precipitation falling as rain or melting snow.

A Blustery End to the Week

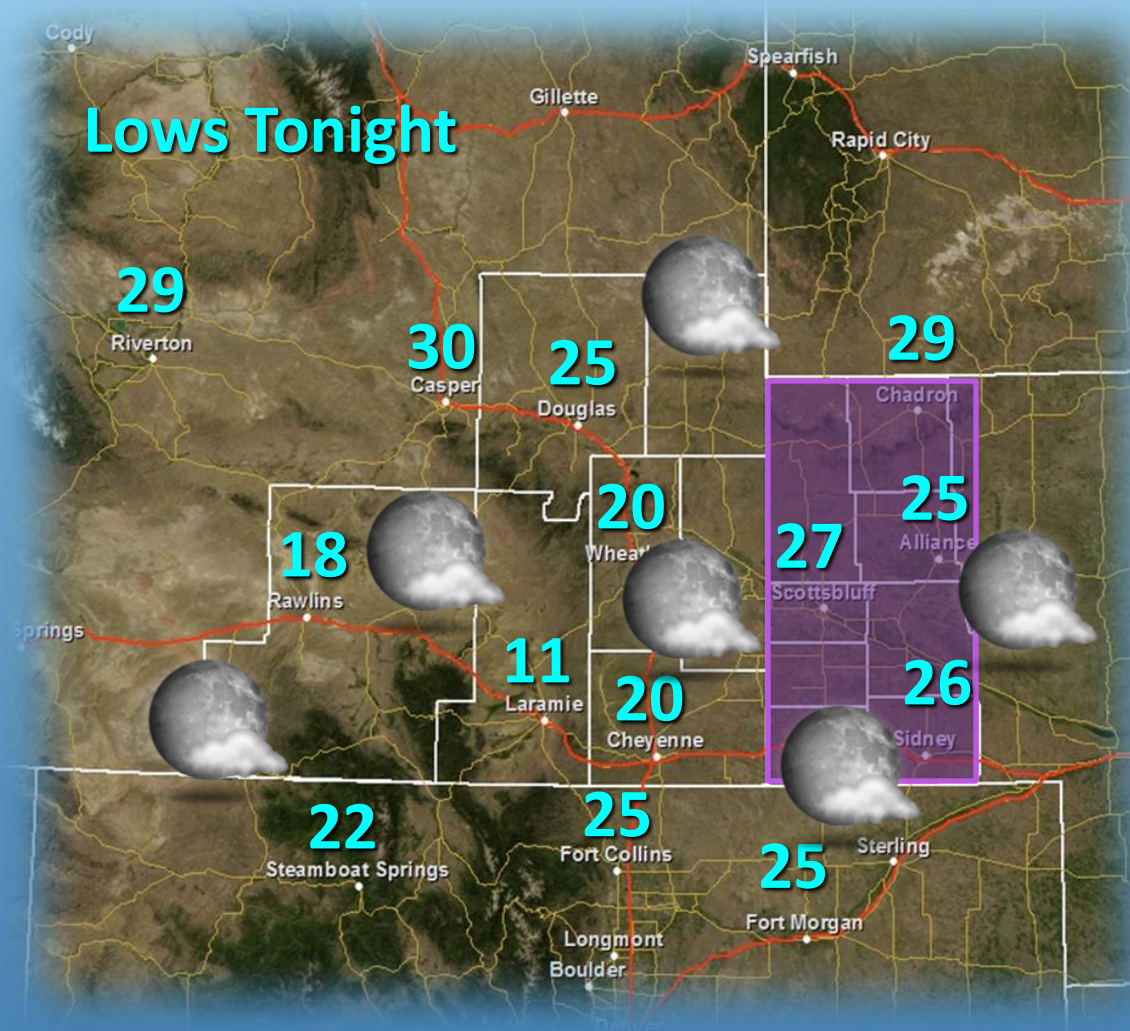

Today

- Cool conditions under mostly sunny skies
- Blustery west to northwest winds gusting 30-45 mph...with the strongest winds over the ridge tops in the NE panhandle & wind prone areas of SE Wyoming

Tonight

- Mostly clear
- Lows in the 20s and 30s
- ***First hard freeze for central and eastern portions of the Nebraska panhandle***
- Make sure sensitive plants are covered or brought indoors
- Prepare sprinkler systems

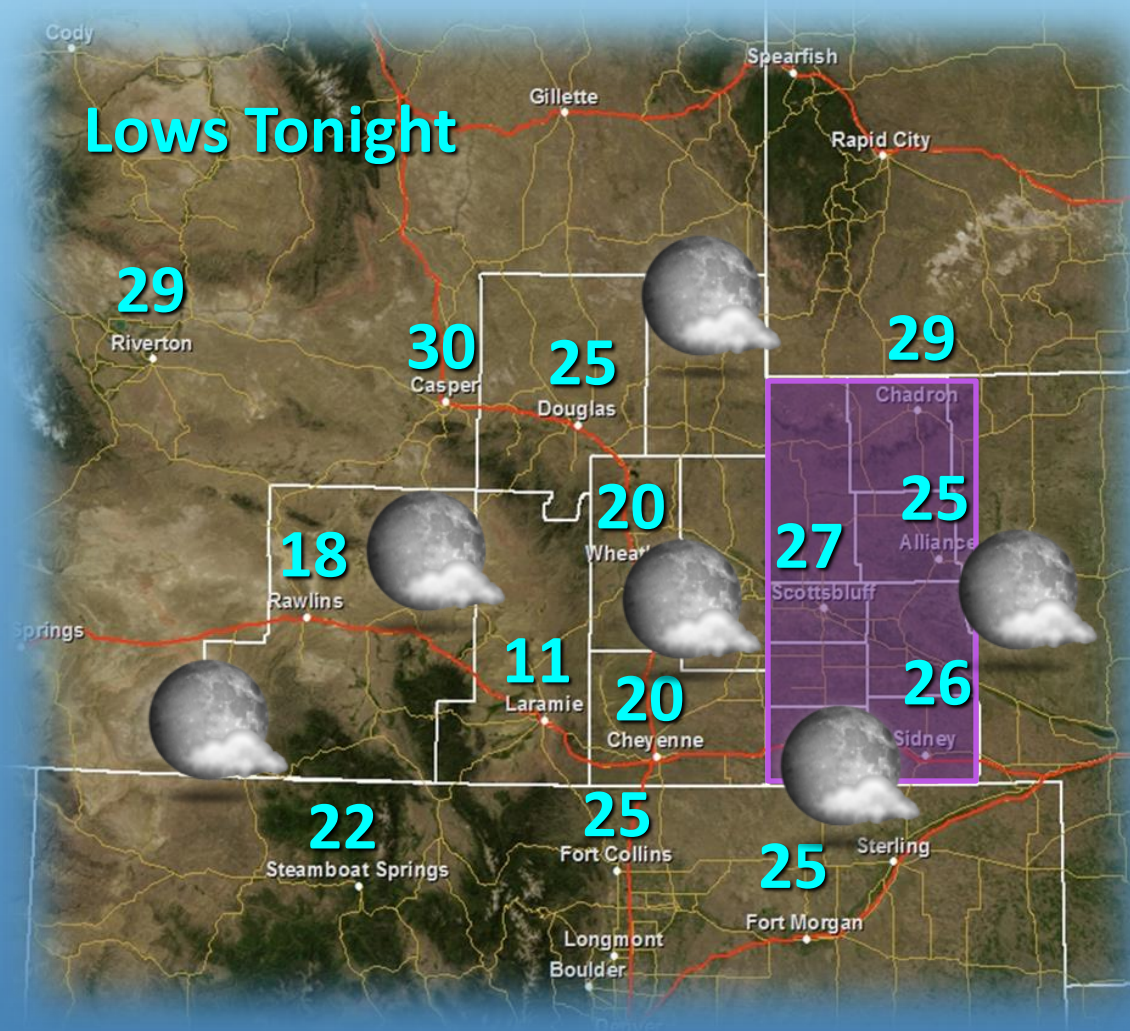

Clearing Tonight...Continuing Cold

Freeze Warning Western Nebraska Panhandle Until 8 AM MDT Tuesday

- Despite temps near 50 today in western NE, widespread middle 20s are expected overnight tonight.
- Make sure any sensitive plants are covered or brought indoors.
- Sprinkler systems could be damaged.
- Lower impacts for southeast WY as snow is still on the ground, and temps were well below freezing during the storm.

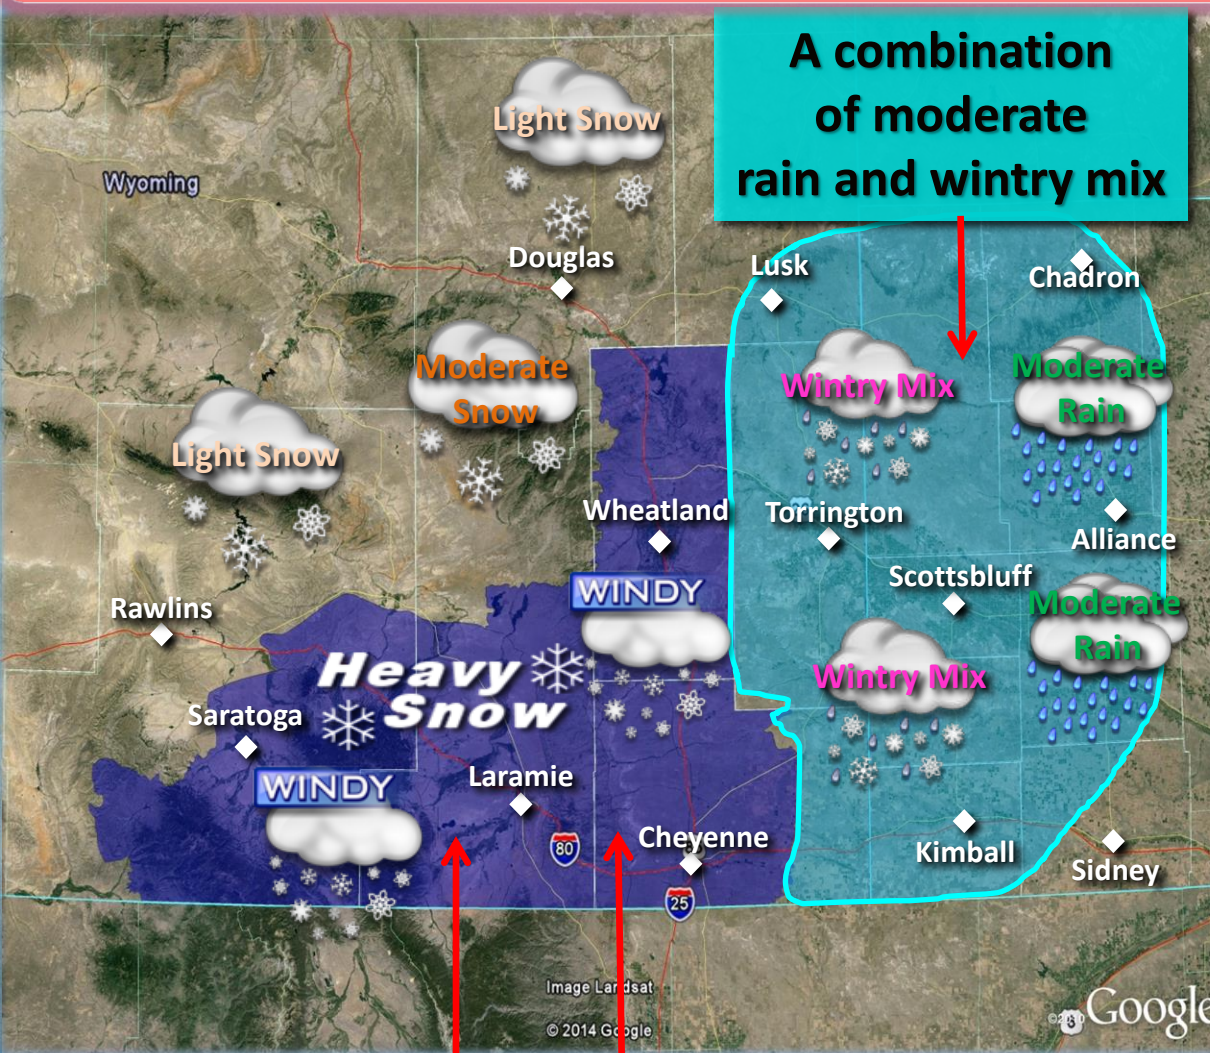

Clearing Tonight...Continuing Cold

Freeze Warning Western Nebraska Panhandle Until 8 AM MDT Tuesday

- Despite temps near 50 today in western NE, widespread middle 20s are expected overnight tonight.
- Make sure any sensitive plants are covered or brought indoors.
- Sprinkler systems could be damaged.
- Lower impacts for southeast WY as snow is still on the ground, and temps were well below freezing during the storm.

Significant Spring Storm Saturday Night & Sunday

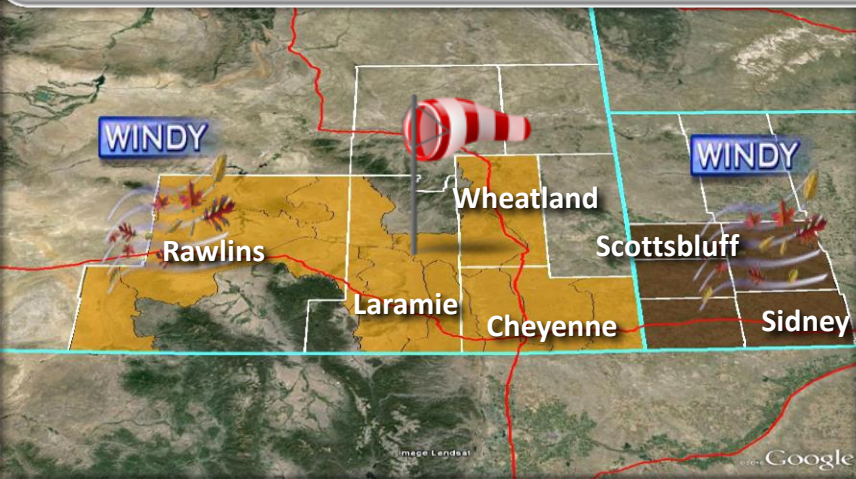

**A combination
of moderate
rain and wintry mix**

Winter Storm Watch

What	Where	Timing	Impacts
Heavy Snow (12+)	Sierra Madres and Snowy Ranges	Snow Developing Sat. Evening and Continuing through Sunday	Roadways Snow Covered and Icy (Potential Road Closures)
Heavy Snow (6+)	Southeast of a line from Saratoga to Wheatland (5000 ft to 8500 ft)	Rain turning to heavy snow after midnight	Roadways will become Snow Covered and Slick Reduced Visibility
Gusty Northeast Winds (25 to 35 mph)	Entire Area	Strong winds will develop after midnight and continue Sunday	May create Near Blizzard Conditions in elevations above 5000 ft
Mix of Snow and Significant Rainfall	Southeast of a line from Torrington to Chadron (Below 5000 ft)	Saturday night through Sunday	Potential small stream flooding and slick roadways

A FRIGID November Night

Temperatures will remain well below zero tonight with winds generally around 5 mph.

Wind Chill Advisories are in effect for much of SE Wyoming & the Nebraska Panhandle thru 9 AM Thursday for **Wind Chills** of **-20° to -30°**.

- Bundle up and wear layers if you must go outside.
 - **Frostbite** can occur very quickly on exposed skin!
- Bring a winter weather car kit if you are traveling long distances.
- If your car breaks down, STAY IN YOUR VEHICLE and await help!
- Do not allow your pets to be outside for long!

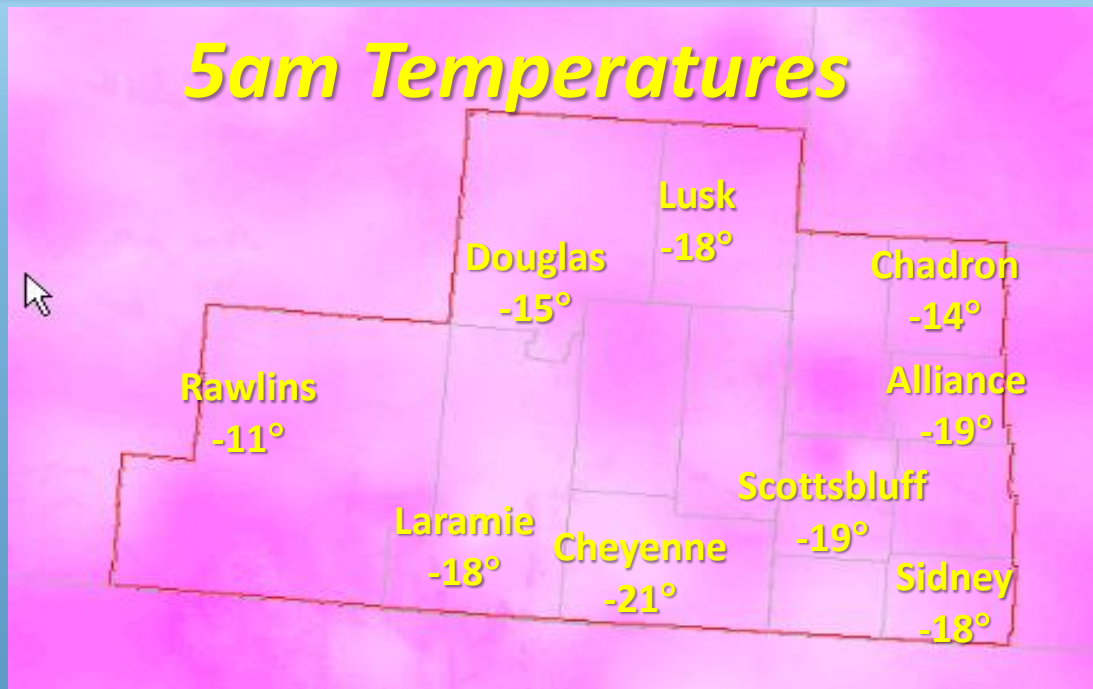

Wednesday Morning Commute

What's Happening Now:

- Frigid temperatures this morning, climbing to near zero this afternoon.
- **Wind Chill Warnings** for SE Wyoming and Nebraska Panhandle thru Noon. Wind chills of -30° to -40° . Slick roads due to yesterday's snow.

Prepare:

- Bundle up and wear layers.
 - **Frostbite** can occur very quickly on exposed skin!
- Bring a winter weather car kit if you are traveling long distances.
- If your car breaks down, ***STAY IN YOUR VEHICLE*** and await help!
